

Day 6 – Hands-On Linux File & Directory Management

Task 1

1. Create a folder called LinuxPractice

```
mkdir LinuxPractice
```

2. Enter the folder

```
cd LinuxPractice
```

3. Create student.txt

```
touch student.txt
```

4. Add "My Linux Practice" to the file

```
echo "My Linux Practice" > student.txt
```

5. Display the file

```
cat student.txt
```

6. Create a copy called backup.txt

```
cp student.txt backup.txt
```

7. Rename student.txt to linux.txt

```
mv student.txt linux.txt
```

8. List the files

```
ls
```

9. Check the current directory

```
pwd
```

10. Delete backup.txt

```
rm backup.txt
```

Task 2

1. Create a folder called ProjectWork
`mkdir ProjectWork`
2. Enter the ProjectWork folder
`cd ProjectWork`
3. Create notes.txt, report.txt and data.txt
`touch notes.txt report.txt data.txt`
4. Add "Linux is easy to learn" to notes.txt
`echo "Linux is easy to learn" > notes.txt`
5. Add "Cybersecurity Practice" to report.txt
`echo "Cybersecurity Practice" > report.txt`
6. Display the contents of notes.txt
`cat notes.txt`
7. Create a folder called Backup
`mkdir Backup`
8. Copy notes.txt into the Backup folder
`cp notes.txt Backup/`
9. Rename data.txt to logs.txt
`mv data.txt logs.txt`
10. List all files and folders
`ls -la`
11. Enter the Backup folder and check its contents
`cd Backup`
`ls`
12. Return to the ProjectWork folder
`cd ..`
13. Delete report.txt
`rm report.txt`
14. Display the current directory
`pwd`
15. List the final files and folders
`ls -la`

Expected final structure

```
ProjectWork/  
■■■ Backup/  
■   ■■■ notes.txt  
■■■ logs.txt  
■■■ notes.txt
```
